Professional Experience

Data Analyst — Euromonitor International, Bengaluru, India

- Developed Excel dashboards and data collection templates for comprehensive data visualization and decision-making.
- Applied Power BI and Power Query to clean, transform, and model complex datasets; built interactive dashboards for stakeholders.
- Utilized SQL in Google BigQuery for data extraction, transformation, wrangling, and analysis across multiple structured tables.
- Directed end-to-end consulting research projects covering consumer trend analysis, forecasting, and in-depth analyst interviews.
- Prepared competitive market landscapes across retail, e-commerce, packaging, and automotive sectors.
- Led Qualtrics survey programming for Google's Global Business Solutions — Consumer Experience (10 geographies, 500 respondents/region).
- Spearheaded a team of 10+ in-country analysts as Project Manager for APAC quarterly and annual market size deliverables.

DataMantra - India

- Delivered training to 5000+ professionals, covering Python, SQL, Power BI, Excel and Tableau Learning for business and data analysis applications.
- Conducted hands-on workshops on **Advanced Excel** including formulas, pivot tables, and dashboard creation to drive data-informed querying and decision-making as well as optimising AI usage for the same.
- **Python for Data Analysis:** Instructing on NumPy, Pandas, and data wrangling techniques to automate repetitive analytical workflows and process large datasets efficiently.
- **SQL Mastery:** Teaching query optimization, and data extraction across relational databases including practical use in Google BigQuery.
- **Power BI & Power Query:** Leading sessions on building interactive dashboards, data modelling, and DAX fundamentals tailored to real-world business reporting needs as well as leveraging power query for data analysis and transformation.
- **Tableau for Storytelling:** Guiding learners in transforming raw data into compelling visual narratives using calculated fields, filters, and dynamic charts.

Google Reviews

What students say about Dnyanesh Padmane

Harshada Yerpude ★★★★★ 6 reviews

I would like to thank Dnyanesh for the fantastic SQL training sessions. His teaching style made complex topics easy to understand, and his guidance really helped me strengthen my learning. I truly appreciate the effort and clarity he brought to each session.
Highly recommended!

Akshad Shegokar ★★★★★ 2 reviews

Dyanesh Padmane’s course on Excel, Power BI, Python, and SQL was very practical and easy to follow. His hands-on teaching style made learning simple and helped me gain confidence quickly. Highly recommended for anyone starting in data analytics.

Bhavnee Mangal ★★★★★ 1 review

Dnyanesh explained SQL and Excel concepts in a very practical and easy-to-understand way. His hands-on approach helped me improve my query writing, data handling, and reporting skills. A great mentor for anyone looking to build strong technical skills in SQL and Excel.

Kaustubh ★★★★★ 5 reviews

I had the pleasure of learning SQL from Dnyanesh. Not only did he clear all the concepts of mine in an online class by showing various functions available in SQL but he also applied them to various situations and made it crystal clear how I could also apply the concepts to different real life scenarios. Also, his way of teaching was such that someone who had no prior knowledge of the subject could also grasp the topic very easily.

Akshay Bhatti ★★★★★ 14 reviews

Dnyanesh Padmane is a very knowledgeable person in the field of SQL and Excel, which made learning easy. He very well provided hands on experience and guided us through out the courses
